Title: **ENHANCING HYPERTENSION DIAGNOSIS AND MANAGEMENT KNOWLEDGE AMONG GENERAL PRACTITIONERS IN PAKISTAN: EVALUATING THE IMPACT OF THE TRAIN THE TRAINER (TTT) INITIATIVE.**

Project #	PI Name & Address	Final NBC-R Comments
NBC-1049	Prof. Tariq Ashraf Karachi Institute of Heart Diseases (KIHD), Block 16 Gulberg Town, Karachi.	<ul style="list-style-type: none"> Sample size calculation mentions that the PI expects a 10% improvement in knowledge after the intervention. Is this a significant change especially with a condition like HTN which is so common in Pakistan? Please provide details as to the education activity. Where will it be held? Workshop content? Influence by the sponsor for the event? Does not Karachi Institute of Heart Diseases have its own IRB? If so, the project should be approved by the concerned IRB as well. Informed consent form needs to be looked at. It is asking for informed consent for surgery. How will the sample be collected from all 4 provinces to make it representative for Pakistan? How will this data reflect on the medical education institutions of the country if knowledge on HTN among GPs is determined to be poor? Which other countries are involved with this project?

Title: **ABILITY OF THE VE818 TO REDUCE ENTEROPATHOGEN COLONIZATION AND IMPROVE ENVIRONMENTAL ENTEROPATHY IN PREGNANT WOMEN: A PROOF OF CONCEPT AND PHASE II RANDOMIZED PLACEBO-CONTROLLED TRIAL IN BANGLADESH, PAKISTAN, ZAMBIA AND BURKINA FASO.**

How will cases be randomized? How many arms are there in this trial? Is there a control arm? What are the clinical end points that will be determined to see if one category is superior or not? Who will assess these clinical end points as the PI and her team are confined mostly within the laboratories? The informed consent form and assent form (for children) should reflect the purpose of the study and that this is an RCT and anyone can be assigned any arm. What harms or benefits are to be expected needs to be clearly mentioned in the form along with contact numbers of the PI and her team. Where will the drugs be administered? Will this require hospital stay? Is this covered for trial participants? What about tests? Will they be free of cost? We need to see the drug leaflet which gives information about the drug. Will a DSMB be established? Where is the funding for this project coming from?

Title: **CHARACTERISTICS AND OUTCOMES OF PATIENTS WITH SEVERE DENGUE ADMITTED TO PAKISTAN REGISTRY OF INTENSIVE CARE (PRICE) COLLABORATING UNITS ACROSS PAKISTAN: A PROSPECTIVE SURVEILLANCE STUDY.**

Project #	PI Name & Address	Final NBC-R Comments
NBC-1055	Prof. Madiha Hashmi CEO SEARCH/Leading PRICE 199-E, Street 6 Cavalry Grounds Lahore Cantt	<ul style="list-style-type: none"> Dengue is already a condition that is mandatory to report to the governmental organization. All hospitals and laboratories are bound to upload on government portal / report. This is a more comprehensive method and applicable. How the study proposed by PI adds to the existing database. The case definition about dengue is not according to the standard practice of Pakistan, WHO and CDC. The operational definitions are required. Some of the main dengue management centers like Mayo Hospital Lahore is not part of data collecting site, while NICVD which has nothing to with dengue is included. How various study sites are chosen? What is the expertise of PI in context of dengue disease? Ethical approval from all study sites is warranted. Funding source and allocation and other details are not found. Laboratory tests results done in dengue patients are to be mentioned especially how it will be ensured that kits used were same as reports may vary. How data entry shall be done. Detail of the process is required as management of the patient's changes even over the hours based upon the condition of the patient. Redcap form is too extensive data entry may an issue. As this is not a pandemic and endemic condition, consent waiver is not applicable.

Title: **SEXUAL HARASSMENT: UNDERSTANDING THE PROBLEMS OF WOMEN ARCHITECTS AT THEIR WORKPLACE.**

Project #	PI Name & Address	Final NBC-R Comments
NBC-1057	<p>Humaira Nazir Assistant Professor- Dept of Architecture and Environmental Design Sir Syed University of Engineering and Technology Karachi,.</p>	<ul style="list-style-type: none"> • Subject is interesting. However, methodology and tool to be used are not clear. Many of the questions in the tool are not phrased properly, problematic and ambiguous. A validated tool is required in context of Pakistan. This study is of women thus gender related information is illogical. From which source subjects shall be identified? What shall be the sample size? The type of study design qualitative / quantitative is also confusing. • Consent form is required even if for an online survey. • Funding source and its allocation not found. What shall be done after data collection? • Some of questions may be emotionally stigmatizing. What shall be done in such a situation? • CV of both PI is required, especially in context of research question and previous experience.

Title: **PAKISTAN SOCIETY OF NEPHROLOGY (PSN) – RENAL REGISTRY.**

Project #	PI Name & Address	Final NBC-R Comments
NBC-1058	<p>Dr. Salman Imtiaz Indus Hospital and Health Network Main Shaharah-e-Faisal, Karachi, Pakistan.</p>	<ul style="list-style-type: none"> • ERC from institutions is required. Some of the institutes like PKLI Lahore is missing. How registry then may be considered as inclusive. • Many questions are incomplete or inadequate information is asked. This includes no mention of Single /divorced related information. • Psychiatric patient's exclusion is also not appropriate for a registry. • Study population ethnicity will be a good addition. CNIC is an important identifier so as to reduce redundant data (duplication). • How the inclusion of same patient from two different centers will be identified? • Consent waiver as mentioned in the form is not appropriate. • CV of the PI is also not in a proper format. • Society funds. • Why donors are expected to contribute towards data collection. Is there a clear policy in this context? • There is registry related to renal diseases is available of internet from Pakistan. This needs clarity. • Clarification is also needed as to the prospective versus retrospective data collection and quality control as mentioned.

Will this be qualitative or quantitative?• Where will the HT LV serology be done? If in Pakistan who will certify the results as there is no laboratory person as a part of the team as far as we could determine.• The POC testing will also be done for the analytes using Alere, Unigold and SD Bioline devices and will be compared with gold standard PCR, where will these tests be done and who will verify the results?• Three spots 140 ul each, from the second 5 ml tube will be spotted on a plasma separation card, these three spots add to 0.42 ml of blood, for what will the extra blood be used for?• What is the specification of the Plasma separation card, who will verify the spotting, as the layering causes unreliable results? How will these be dried and packed as special envelopes are required for transportation? Who will verify the quality of blood spots for elution, how will these be eluted, where will these be tested for comparison with gold standard PCR.• Where will the samples be stored before shipping to Australia and who will be responsible for deidentifying the samples?• Who is the responsible person for data analysis?• English version of consent form is missing.• The Urdu version does not state that the blood samples will be sent to NRL-Australia.• Adverse events are very much detailed but the protocol does not state how these will be addressed and should be part of the consent form.• Material Transfer Agreement is missing.• How will the participants be benefited after HT LV DNA is done in NRL-Australia?• In this study, the technology is being tested. Why is there a need for collecting the samples from specified high risk groups when the leftover positive samples can be available for testing POC, Alere, Unigold and SD Bioline devices and also for the blood spots on Plasma separation card.• This study is purely lab related and we would like to know the responsible under whose supervision this will be carried out.• Please clearly state the methodology of this study.

Have our govt. bodies been taken on board for this study? We would like to see their letters of support. Please explain the strategy for taking in-depth interviews? Who will approach them? How will informed consent be taken? Husband and wife are being interviewed together? How will confidentiality be maintained? Which tests or samples are being collected? Is it screening for HIV? If tests become positive then what are the measures to be taken? Who is/are the local PIs involved in this research? Is NIH Pakistan involved? If yes, we need to see their IRB approval. Please share an itemized budget. Our main concern was that an outside body/person is taking responsibility for this research on a sensitive and potentially stigmatizing topic in an area which is volatile in terms of such information and studies. Please ensure local involvement with adequate community engagement.

The following projects reviewed / discussed:

Title: **Rapid Detection of TB from Blood using Cell- Free DNA and CRISPR. Version- 03.**

Project #	PI Name & Address	Final NBC-R Comments
NBCR-1131	<p>Dr. Sabira Tehseen Technical Advisor National TB Control Programe Block E and F EPI building NIH, Park Road Islamabad. Prof. Timothy Rodwell, MD, PHD, MPH, Prof. of Medicine, Division of Pulmonary, University of California San Diego, USA</p>	<ul style="list-style-type: none"> How will this study benefit our population? Will the Pakistani population be provided the technology that would be developed as an outcome? What about capacity building of the PI, his/her team and our National TB control program? This study cannot be just transfer of materials to the PI's country without reciprocating in structural benefits. Is there a data sharing agreement or a technology transfer agreement in place? What is the currency amount being mentioned in the document? That was not clear.

Title: **ICU-related Out of Pocket Expenses (ICOPE) – a multinational prospective study in African and Asian countries.**

Project #	PI Name & Address	Final NBC-R Comments

Title: **Trial: Micronutrient supplementation in pregnancy and postpartum: protocol for an adaptive trial “MOM-CARE”.**

Project #	PI Name & Address	Final NBC-R Comments
NBCR-1170	Dr. Fyezah Jehan Dept of Pediatrics and Child Health The Aga Khan University, Karachi, Pakistan	<ul style="list-style-type: none"> At places it is UNIMAPP, at places its MMS. There is no abbreviation available for UNIMAPP (Trial summary, page # 3) Ali Akbar Shah Goth (AG), Bhains Colony (BH) and Qayyumabad (QB). Two of these sites i.e. AG and BH are peri-urban communities located in District Malir and the third site is Qayyumabad which is located in District Gadap. – Which are the centers from where women will be enrolled?? How can it be a single site?. Only one clinic has delivery facility, and not operative delivery facility. These patients are then referred to the tertiary care hospitals. It is misleading. The population at these places is severely anemic, putting them only to MMC will be disastrous. What is your partner’s main occupation? Should be “husband” NOT partner Baseline- Questionnaire who is being asked to fill it?? It says widow, separated etc . This may be

		sensitive to ask from a pregnant woman • If the ultrasound is abnormal what measures will be taken? Will the primary physician be informed?
